OLD BISCAYNE DESIGNS

Furniture Hardware...

Like jewelry for the home

Defines the last layer of style

For each furniture design.

Within these pages you will discover hardware created using chrome, brushed nickel, antique silver, oil-rubbed bronze, antique pewter, and more. Designs range from old world antiquities to the simplicity of modern styles.

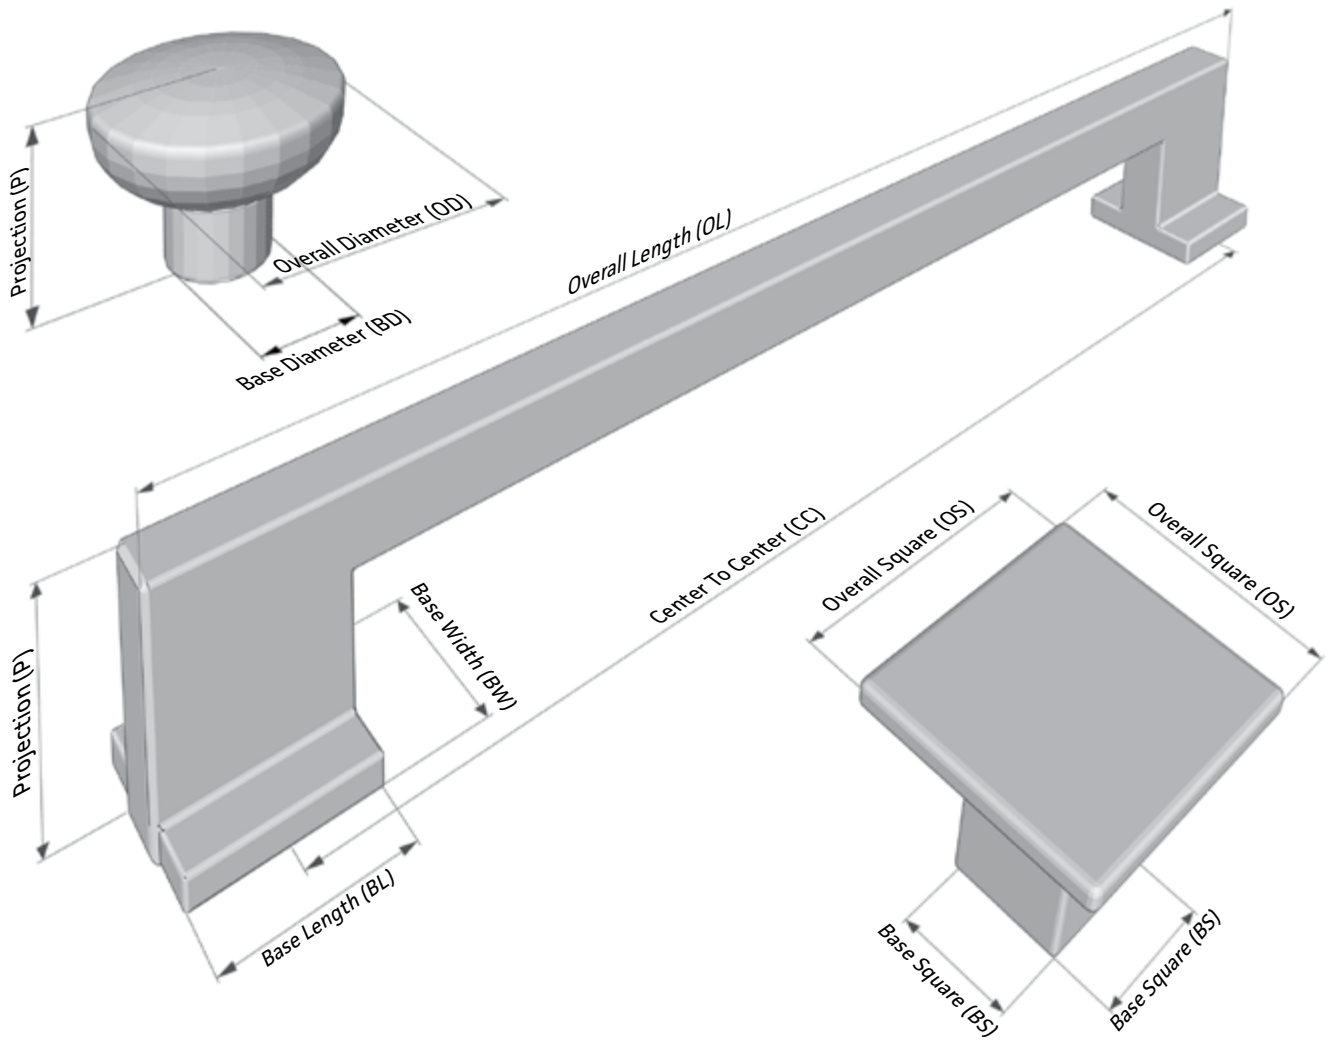

Many designs start as an original lost wax casting, like a fine jewelry design. These pieces are produced in multiples using a method called sand casting. Artisans create chemical patinas refining the delicate shades and hues to enrich the depth of hand cast cracks and crevices. These designs are unique; no two will be exactly the same.

Hardware is cast using semi-precious metals. Each design is only available in the metal pictured. If a customer does not designate a particular hardware, our furniture technicians will apply the hardware that best accentuates the style of the piece or the hardware pictured on the original design.

Each Old Biscayne Finish
Is The Final Signature
Of A Unique Original Design.
