### **VELVET WAIVER**

When using velvet, too often it arrives from the fabric supplier crushed and with many surface inconsistencies caused by the bolt being bent or pressed against during transit. After application, these problems may also occur with marks caused by packing materials pressing against the fabric during shipment. We cannot be responsible for marks such as this caused in the course of transit or due to prolonged storage. Also, when self-welting, the fabric is often too thick.

By signing this waiver I hereby agree to hold OBD harmless for any damage/defect that may or may not occur, or be seen on the velvet.
